Description

Modify starter code to create a command-line application that dynamically generates a professional README.md file from a user's input using the Inquirer package

License

This application is covered under the [Apache 2.0 License](#)..

Installation

1. Install node.js
2. Create package.JSON file by running "npm init-y" command
3. Open new repo in VS Code
4. Install inquirer by running "npm install"

Usage

Run command "node index.js" and answer prompted questions in terminal to create the README.md.

Contribution

University of Kansas resources

Test

All tests can be run in the integrated terminal and also by following the instructional video
